

DEBAYUDH BHATTACHARYA

AI/ML Engineer & Full Stack Developer

Email: debayudh.bhattacharya@example.com | Phone: +91 98765 43210 | Location: India
GitHub: github.com/Debayudh | LinkedIn: linkedin.com/in/debayudh | Portfolio: debayudh.dev

PROFESSIONAL SUMMARY

Innovative and results-driven AI/ML Engineer with deep expertise in designing, training, and deploying machine learning models, neural networks, and scalable full-stack applications. Proficient in deep learning frameworks (TensorFlow, PyTorch), natural language processing, and computer vision systems. Skilled at bridging the gap between advanced AI models and modern web technologies (React, Node.js, Three.js) to deliver beautiful, performant, and intelligent user experiences.

CORE TECHNICAL SKILLS

AI / Machine Learning:	Deep Learning, NLP, Computer Vision, Neural Networks, PyTorch, TensorFlow, Scikit-Learn
Languages:	Python, JavaScript, TypeScript, C++, HTML5, CSS3, SQL
Frontend & 3D:	React.js, Next.js, Redux Toolkit, Three.js, React Three Fiber, Tailwind CSS
Backend & Cloud:	Node.js, Express, FastAPI, MongoDB, PostgreSQL, Supabase, REST APIs, WebSockets
Tools & DevOps:	Docker, Git/GitHub, CI/CD, AWS, GCP, Firebase, Figma, Linux

PROFESSIONAL EXPERIENCE

Senior Software Engineer (AI focus) Innovation Labs	Jan 2024 - Present
- Leading development of cloud-native applications with a serverless architecture, integrating AI models. - Implementing real-time data processing pipelines using event-driven patterns and WebSockets. - Mentoring junior engineers, conducting architecture reviews, and driving deployment automation.	
Full Stack Developer Enterprise Solutions Ltd.	Apr 2022 - Dec 2023
- Architected and built responsive web applications using MongoDB, Express, React, and Node.js. - Designed microservices with Docker and orchestrated them using Kubernetes for production scalability. - Automated testing workflows and CI/CD pipelines, decreasing release times by 30%.	
React Developer Digital Agency Co.	Jul 2021 - Mar 2022
- Built single-page applications with React and Redux, improving overall rendering performance. - Integrated complex GraphQL and RESTful APIs, securing fast loading times and data synchronization.	

SELECTED PROJECTS

AI Dashboard & Model Visualizer (React, WebSocket, Tailwind CSS, Python/FastAPI)

- Developed a dashboard for deep learning engineers to track model metrics and training progress in real-time.
- Plotted live training logs (epoch-by-epoch loss, validation accuracy) using WebSockets and Chart.js/D3.js.

Interactive 3D Web Experiences (Three.js, React Three Fiber, GSAP, WebGL)

- Programmed fully interactive 3D portfolios and product displays with customizable lighting, camera movements, and materials.
- Optimized GPU assets and textures, ensuring seamless 60fps renders on mobile and desktop platforms.

EDUCATION

Bachelor of Technology in Computer Science | AIML Specialization

Graduated 2021

Focus areas: Neural Networks, Machine Learning Algorithms, Data Structures, Software Engineering.
